

# SEMI-AUTOMATED DRY HEAT BIOBURDEN REDUCTION MODULE

## MODEL 1600 Standard Product Info

- Allows N95 masks to be used up to 5 times
- Module arrives in turnkey ready condition
- Powered by Heating Oil
- Masks marked and returned to original user
- Interior shelving, and 10,000 bags for N95 processing included
- 24 Hour Temperature Cycle Recording
- Secure Lockable Doors
- FDA Authorized under *Enforcement Policy for Bioburden Reduction Systems Using Dry Heat to Support Single-User Reuse of Certain Filtering Facepiece Respirators During the Coronavirus Disease 2019(COVID-19) Public Health Emergency* [www.fda.gov/media/143985/download](http://www.fda.gov/media/143985/download)

## General Product Specifications

<b>Capacity</b>	Up to 24,000 N95 masks per day (2,400 masks per cycle)
<b>Bioburden Reduction of SARS-COV-2</b>	12-log - 99.9999999999%
<b>Cycle Time</b>	1.5 hours
<b>Size (Exterior)</b>	20'x8'x8.6' plus 6' long ramp
<b>Useable Volume</b>	124"x80"60" (344ft3)
<b>Weight</b>	6,800 lbs
<b>Electric</b>	120 Volt @ 4amp Nema 5-15 (household plug) 100' Cord Included
<b>Fuel</b>	#2 Heating Oil
<b>Fuel Capacity</b>	275 gal, Double Wall Tank
<b>Temperature Range</b>	75° C and 82° C
<b>Warranty</b>	1 Year materials and workmanship
